

Hydrogen Production by Coal Gasification

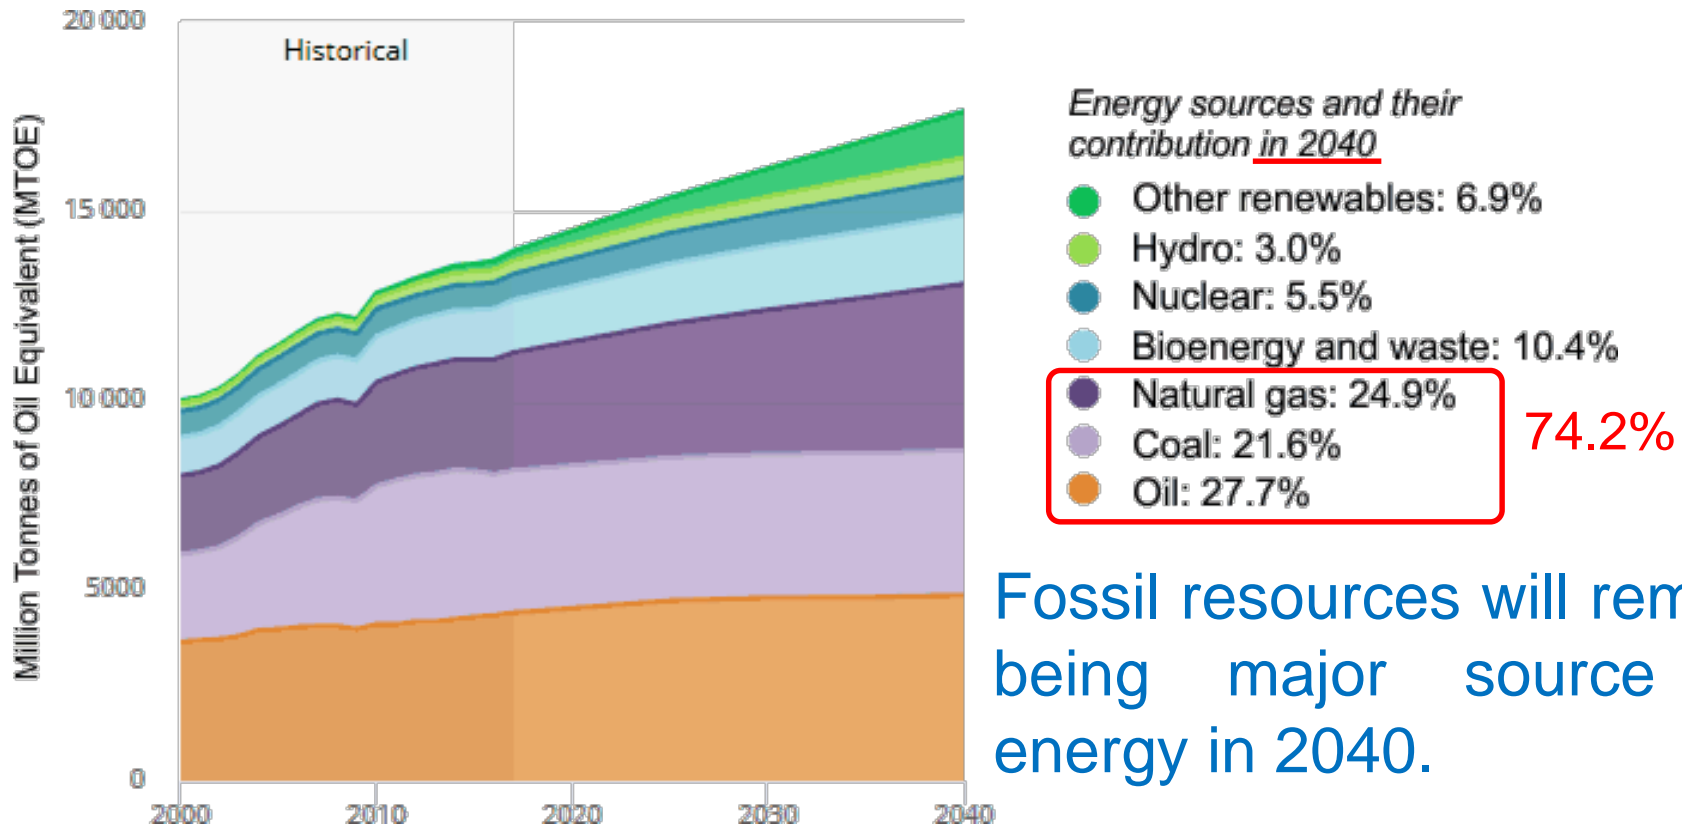

September 2019

Masayoshi Kitamura
Electric Power Development Co., Ltd. (J-POWER)

Global Energy Context

Need for clearer view of using fossil resources with **low to near-zero emitting manner**

Fossil resources will remain being major source of energy in 2040.

Global Primary Energy Demand by Source

Global Final Energy Consumption

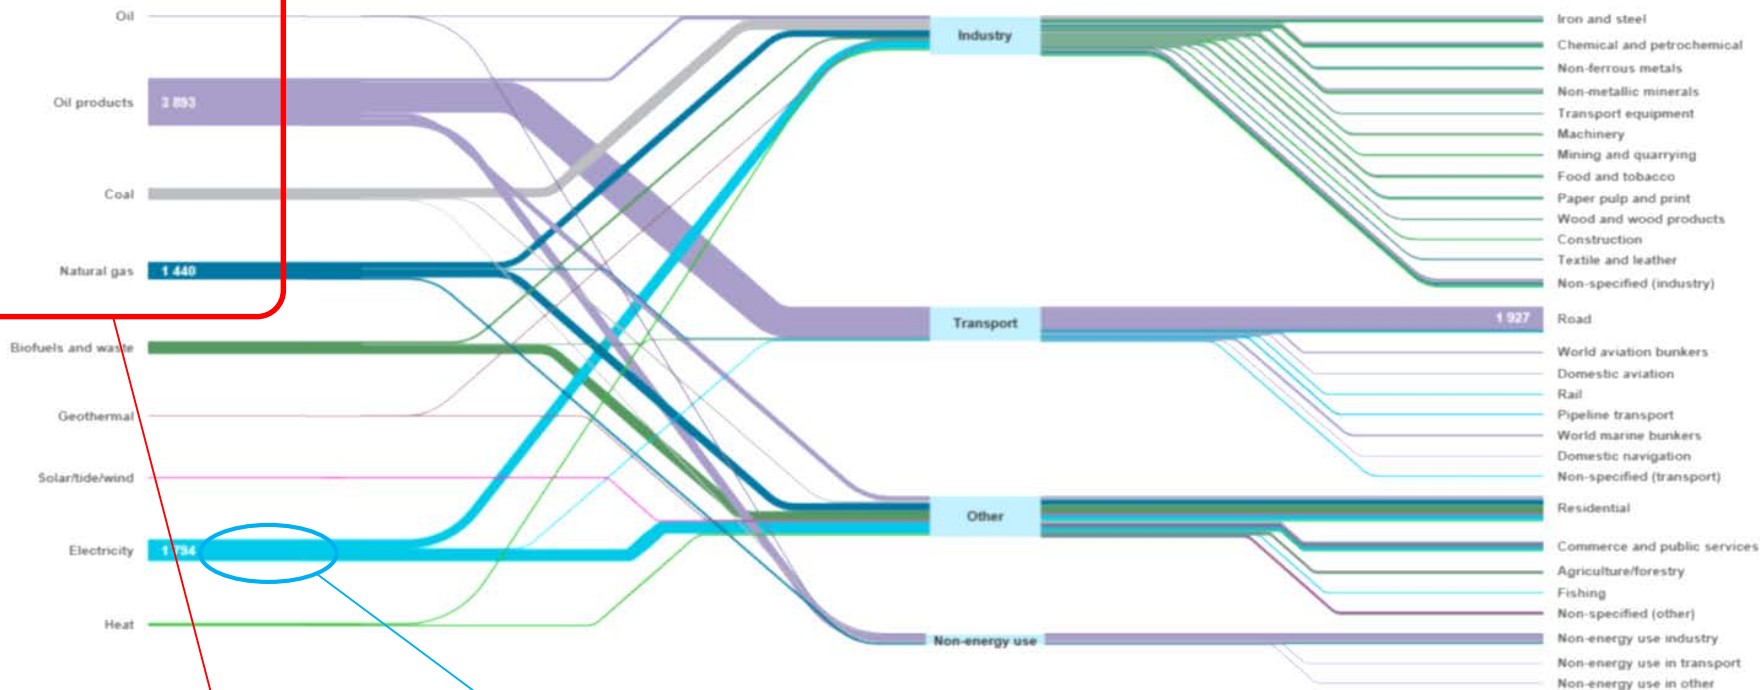

Fossil resources dominate in final energy consumption globally

World
FINAL CONSUMPTION (2016)

Total final consumption
(9 555 Mtoe)

Millions of tonnes of oil equivalent

Fossil resources 67%

Electricity 19%

Hydrogen will become a solution

“The time is right to tap into hydrogen’s potential to play a key role in a clean, secure and affordable energy future.”
